

A new and innovative technology provides pain relief when other treatments have failed.

Our bodies are electrochemical organisms. Up until now we have chosen to treat the chemical aspect with drugs. At Avyonce Wellness we treat the body by improving its electrical function.

WELLNESS

 **Avyonce**
WELLNESS

At Avyonce, our clinicians provide energizing relief for both chronic and acute issues.

Acute pain is a normal sensation that alerts us to possible injury. Chronic pain is very different and persists for months or even much longer.

The approximate number of treatments will vary per person. However, chronic pain issues will often take 7+ treatments and acute pain about

4 to 6 treatments to improve or resolve the issue. Most clients feel relief and increased mobility from the first treatment. Certain muscles, in specific areas will be targeted. Treatment plans will be designed based on your consultation.

"Wow, after fifteen years of foot pain and stiffness I have my mobility back in just four treatments. I have even gone back to yoga. I am so pleased with the therapy, I would recommend it to anyone experiencing pain."

—Mike, Vancouver
